Reuel John Dilig

Senior Front-End Developer

Redondo Beach, CA 90278 | (909) 997-1393 | rjdofficemail@gmail.com | linkedin.com/in/rjdilig | jdilig.me | github.com/balbonits

PROFESSIONAL SUMMARY

Senior Front-End Developer with 18+ years building production web apps in React, TypeScript, and Next.js across streaming and sports media, enterprise BI/SaaS, consumer products, and live-event platforms. Recent work includes real-time, data-dense UIs (data tables, geographic maps, live GraphQL data, streamed AI query interfaces), enterprise SSO with role-based UI, and subscription auth and payment flows. Uses AI-assisted development (Claude Code, multi-agent workflows) for delivery, documentation, and testing.

TECHNICAL SKILLS

Languages & Frameworks: TypeScript, JavaScript (ES6+), React, Next.js, HTML5, CSS3
State & Data: Redux, Zustand, React Query, React Router, GraphQL, RESTful APIs, JSON data modeling
UI & Styling: Tailwind CSS, Material UI, responsive design, accessibility (a11y)
Data Visualization: Geographic/interactive maps, Chart.js, Leaflet
Auth & Integrations: Enterprise SSO, route-level auth gating, role-based UI, Okta, Stripe
Testing & Quality: Jest, Testing Library, Vitest, WebdriverIO, Selenium, Google Lighthouse, code review
Media & Streaming: JW Player, live-event interfaces, real-time state management
AI-Assisted Development: Claude Code, multi-agent workflows, spec-driven development, LLM tooling, streamed AI response UX
Build & Tooling: Webpack, Vite, Git workflows, PWA/Cordova
Backend Familiarity: Node.js, MongoDB, Java/Spring Boot, ASP.NET (for FE/BE collaboration)

PROFESSIONAL EXPERIENCE

Frontend Developer (Contract) | FOX | Los Angeles, CA (Remote) | July 2026 – Nov 2026

- Merged 48 PRs in ~4 months (~3/week) on a real-time analytics web app (React, Next.js, TypeScript, Tailwind CSS), with 13 features in six weeks: app shell, navigation, loading/error/access states, and sortable, filterable data tables with live GraphQL data.
- Built the natural-language query feature end to end (~22 PRs), with streamed AI answers, saved history, editable sessions, follow-ups, and deep links; took it to production, cutting ~11k legacy lines.
- Used by FOX News analysts and producers on election night (100+ queries); displayed as "Election Insights" during FOX News' election watch.
- Built geographic map visualizations (~12 PRs) with change-scaled trend indicators, density tuning, and missing-data notices; implemented enterprise SSO and claims-driven role-based access for 3 user roles.
- Reviewed 102 teammate PRs (158 reviews), including 6k–11k-line refactors, across 159 Jest + Testing Library files; built multi-agent AI engineering workflows with human approval gates and 20+ tested automation skills.

Senior Front-End Developer | Squanto | Los Angeles, CA (Remote) | October 2025 – June 2026

- Built and shipped squanto.app's entire web UI as sole front-end developer, a live gig marketplace for hosts, performers, and audiences, taking React/TypeScript flows through soft launch.
- Implemented real-time mapping, data visualizations, and analytics interfaces for live data, and extended the same UI to mobile with PWA/Cordova.
- Partnered with the CEO and systems architect in live debugging sessions, and built and fixed Node.js/MongoDB API endpoints for front-end data, including the repo's AI context setup.
- Maintained front-end conventions (routing, design patterns, spec-driven development) and used Claude Code to speed up docs and test coverage. Live: squanto.app

React/TypeScript Developer (Contract) | Trinity Broadcasting Network | Fort Worth, TX (Hybrid) | June 2023 – August 2024

- Led React/TypeScript front-end development for the TBNPlus.com and MeritPlus.com subscription streaming platforms, owning complex user flows including authentication and payment integration.
- Partnered with backend engineers on Okta and Stripe integrations while troubleshooting and optimizing UI performance and reliability.
- Supported and maintained TBN.org and related microsites built on WordPress and Drupal CMS.

Front-End Developer (Contract) | AWS QuickSight | Seattle, WA (Remote) | July 2022 – May 2023
- Built and maintained React, Redux, and TypeScript UI components for AWS QuickSight, AWS's business intelligence platform.
- Delivered production components under strict testing standards and collaborated on cross-functional prototypes for new features.

Front-End Developer (Contract) | FOX | Los Angeles, CA (Remote) | June 2020 – May 2022
- Maintained and enhanced the FOX Web Player (powered by JW Player) used across FOX.com, FOXSports.com, FOX Nation, and other properties serving millions of users.
- Diagnosed and resolved complex UI and WebView issues, including channel branding and compatibility on Xbox and Chromecast.
- Implemented analytics tracing and performance improvements in close coordination with engineering teams.

Front-End Developer (Contract) | ADP | Pasadena, CA | November 2019 – May 2020
- Built and maintained reusable React components and pages for myWisely, ADP's direct-to-consumer debit card platform and hybrid mobile app, targeting both browser and WebView environments.
- Implemented Jest and Selenium WebDriver testing within a Redux, Material UI, and Webpack front-end architecture.

Front-End Developer | FOX Sports (FOX Corporation) | Los Angeles, CA | March 2012 – August 2019
- Built real-time front-end features for FOXSports.com, a high-traffic platform covering the NFL, MLB, NBA, NCAA, FIFA World Cup, US Open, and Olympics.
- Contributed front-end work to “The Vanishing Man,” a Sports Emmy Award–winning longform feature.
- Delivered live scoreboards, event brackets, newsletter tools, ad integrations, and companion video players with JavaScript, React (partial integration), JW Player, and Webpack.
- Shipped multiple full-site redesigns and CMS migrations, partnering with backend teams on proprietary Java Spring services serving JSON/HTML.
- Kept live events reliable through performance optimization, analytics implementation, and on-call PagerDuty coverage for major events and channel launches, including FS1.

UI Engineer | Medversant Technologies LLC | Los Angeles, CA | May 2008 – February 2012
- Owned the front end of ProviderSource.com, a SaaS medical credentialing platform, as primary UI engineer, designing and building it end to end.
- Developed form-heavy interfaces and internal web apps for large-scale data processing workflows.

NOTABLE PROJECTS

- The Vanishing Man: Sports Emmy Award–winning longform feature (FOX Sports): foxsports.com/stories/other/the-vanishing-man
- Squanto.app: Live entertainment gig marketplace: squanto.app
- jdilig.me: Personal portfolio website: jdilig.me

EDUCATION

Associate of Science in Computer Network Systems | ITT Technical Institute, San Dimas, CA | June 2006 – December 2008 (Graduated)
